

The Perfect Storm: The Path to Autism, ADHD and More

This workshop and educational program explores and explains the correlations and connections behind neuro-development disorders such as autism, ADHD, seizures and sensory integration disorder, with a specific emphasis on the role of the brain and central nervous system. You will discover the connections between the neurological and immune systems, and thus why so many kids are so sick and immune-suppressed. You will learn exactly how the brain and neuro-development are supposed to occur, and where it goes wrong with spectrum disorders and developmental delays. **(4 CE hours) Friday, June 8**

The Ethics of Informed Consent Sponsored by ChiroSecure

Learn how to understand and utilize informed consent as the process by which the treating health care provider discloses appropriate information to a patient so that the patient may make a voluntary choice to accept or refuse treatment. You will receive a clear education in the ethical right the patient has to understand the condition for which he/she seeks treatment and understand the recommended treatment plan via informed consent. You also will receive ethical communication guidelines in the doctor-patient relationship. **(1.5 CE hours) Saturday, June 9**

Stu Hoffman, DC

Postural Neurology Sponsored by Clear Gage

You will learn the five anatomical points from which to measure a patient's posture, how to measure posture in three dimensions and how to differentiate acute patterns from chronic patterns. The goal is to help you accurately access X-ray and/or MRI findings in determining the presence neurological deficits and consult with patients to unveil the specific forms of stress which may have led to postural imbalance and neurological interference. **(1.5 CE hours) Saturday, June 9**

The Enigma of Chronic Pelvic Pain Sponsored by Foot Levelers

This condition is nondiscriminatory and can be associated with co-morbidities or as a direct pain generator. There are many different methods of assessment and conservative care treatment options for patients of chronic pelvic pain. During this session, chronic pelvic pain will be discussed from the basics of pathophysiology to biomechanics of the spine and will address assessment and treatment options based on current research. **(2 CE hours) Saturday, June 9**

**Kristina Petrocco-
Napuli, DC**

Opioids and the Far-Reaching Impact on Special Populations

As this crisis does not discriminate practitioners, it is paramount that the focus on our varying patient populations be considered: pediatrics, female health (including pregnancy), geriatrics and veterans. Throughout this class, opioid utilization and the effects on patient-centered inter-collaborative care will be discussed. **(2 CE hours) Sunday, June 10**

The Fraud Lawsuit by Auto Payers Against a Chiropractor – Are PI Provider Networks Next???

Sponsored by PI Back Office

Two major auto insurance payers filed suit in Federal Court against a chiropractor alleging fraud. In this session, you'll get a review of this court case and associated law, learn about the role of consumer choice and consumer protection laws and learn about the role of advertising disclaimers, public notices and claims notices. If you treat a combination of cash and personal injury patients, this is one you want to attend. **(3 CE hours) Friday, June 8**

Keith Pendleton, JD

Chiropractic Prone and the Integration of Acupuncture: Ease of Practice and High Results

The ability of the body to compensate for a lack of the many causes of disease is also the same ability of the body to adapt to a positive stress of correction called an adjustment. In this session, you will learn the prone chiropractic approach, participate in a practice lab and classroom instruction on acupuncture, and discover applications that include common ailments such as trigeminal neuralgia, tics, muscular rheumatism, heart trouble, abnormal blood pressure, and more. **(4 CE hours) Saturday, June 9**
